Agenda Item 4: Report from the Senior Planner (Tab 3)	Action Items
<p><u>Senior Planner's Report</u></p> <ul style="list-style-type: none"> • On track for getting the Recommended Plan submitted to the Parties by June 1st - note that the public release date may be a bit later. Following the Recommended Plan submission, a summary, methodology report, and communications materials will be released. • Big topics for upcoming meetings: climate change integration, alignment with Final Agreements, land designations, general management direction, details around wetlands and cumulative effects. 	

- Currently working on writing up “What we Heard” document with the support of YLUPC staff.
- Cumulative Effects Working Group: will see new disturbance data, based upon 2020 satellite imagery, the 2nd week of April.
- The Peel Implementation Committee attended our March 8 meeting and provided lessons learned and offered to be available to provide advice regarding Plan implementation.
- Coffee Project: decision body has accepted YESAB’s recommendation that the project proceeds. This is a significant project for the Dawson planning region, including the Northern Access Route.
- North Fork Hydro project: DRPC provided a submission to YESAB outlining relevant sections of the Draft Plan that would apply. Given ours is a Draft Plan, the response did not state whether the project was in conformity with the Plan or not.
- Fortymile placer project: has gone to YESAB in the past and has not been allowed to proceed because of proximity to heritage sites and the river. There are no conflicting management directions in LMU 15. DRPC is drafting comments for this project in the same manner as comments on the North Fork Hydro project. The Commission discussed whether the project qualified as one that they should be commenting on given capacity limits. Staff pointed out that though the project is small, there are exceptional cultural and traditional economy implications. **Commission agreed that a response be submitted.**
- The Parties (TH and YG) will continue to be engaged, at both the technical and Senior Liaison Committee level. Only 9 weeks left. Several meetings coming up over the coming weeks – lots of decisions to make.
- A letter of transmittal will accompany the Plan submission, which will address at the strategic level, how the Plan intends to be interpreted and implemented: an important thing to do collaboratively.
- Staff are working on a Communication Plan which addresses how the Commission communicates with media, stakeholders, the public, news releases, websites etc. Next week’s working session will focus on this.
- The Commission will attend the Gold Show May 20, 21, 2022 and will be sharing a booth with YESAB – staff clarified they are sharing the booth only because booths are very large and costly and neither group requires the full space for a single booth.

Staff to send draft response to the Fortymile Placer Project submission to Commission Members today - Commission to review and identify if any concerns.
